16.2 Society Sales shall be held, organised, sponsored or authorised as the Council may from time to time determine.

16.3 No Branch or Branch Committee shall advertise a Branch Sale as being a Society Sale which has not been sponsored or authorised by the Council.

16.4 Where a Branch holds or organises a Society Sale on behalf of the Society, the Council shall determine the rules and regulations which apply to such sale, and the Branch Committee shall be responsible for the organisation and conduct of the sale and for ensuring that the said rules and regulations are adhered to, observed and performed.

16.10 The Society’s National Sale Committee or the Branch Committee (as the case may be) shall appoint auctioneers for the purpose of the Society sale, and will cause the appointed auctioneers to advertise and invite entries for the Society Sale approximately two months before the sale date. 16.22 The buyer shall pay the full purchase price to the auctioneers at the Society Sale.

16.23 Where during a Society sale a buyer discovers or believes that the sheep which he has purchased at such sale is physically malformed he shall report the said matter to the auctioneers before the termination of the Society sale. The auctioneers shall arrange for such animal to be examined by a veterinary surgeon and the joint decision of the auctioneer and the veterinary surgeon as to whether such animal is physically malformed and, if so, the remedy shall be final and binding on the buyer and the seller.

16.24 Where any sheep fails to reach the minimum selling price as determined by the National Sale Committee or the Branch Committee (as the case may be), commission shall be payable on the upset price if particular conditions for the Society sale so provide and in accordance therewith.

16.25 Each member is personally responsible for the correctness of all information provided by the member regarding the health or status of any sheep and the Society is not liable for any errors, intentional or otherwise, with regard to information provided by the member regarding the health or status of any sheep.

16.26 Subject to the provisions of this Bye-Law 16 all disputes or differences of any kind which arise at or in relation to the auction, whether between a seller and a buyer or amongst bidders or otherwise shall be referred to the auctioneer and their decision shall be final and binding on all parties.

Higher value = more profit per lamb

texelplus economic indexes support the breed's development with a focus on commercial traits and profitability. Over the last five years there has been a 15% increase in the rate of genetic gain in the terminal index, providing increased benefits to commercial producers choosing Texel.

Index	Average	Top 25%	Top 10%	Top 5%	Top 1%
Terminal Expected change in profit per terminal lamb born	£4.12	£5.38	£6.51	£7.19	£8.46
Replacement Expected change in profit per replacement lamb born	£4.80	£6.19	£7.46	£8.21	£9.62

The **TERMINAL** and **REPLACEMENT INDEXES** reflect the breed's influence on industry, with both presented as the potential extra profit per commercial lamb born, over the population baseline. The **TERMINAL INDEX** is weighted for meat production and supports increased profitability through improving prime lambs. The **REPLACEMENT INDEX** includes additional maternal traits to optimise production of female replacements.

Commercial producers solely producing prime lambs should use the **TERMINAL INDEX** to inform their selection; however, those retaining female replacements should use the **REPLACEMENT INDEX**.

Sub-indexes underpin the indexes to provide more information on the relative values and ranking of animals for growth, fat and muscle weight, and reproduction.

An example

High ranking rams can deliver over £3.00 more per lamb than lower-ranking rams. Over a ram's working lifetime, this is easily worth an extra £690 per ram; generated through shorter finish times and improved carcass quality.

Trait weighting

Different emphases given to individual traits in the terminal and replacement indexes, resulting in different sub-index ranks. AVG+ indicates above-average animals.

Growth

The benefit from growth using eight-week weight and scan weight information. Faster growth is more advantageous.

Fat weight

Ranking for fat weight in the carcass. Encourages fat cover.

Reproduction

The commercial benefit of lambing ease, litter size and maternal ability. Promotes optimum litter sizes and better mothers.

Muscle weight

Ranking for muscle weight in the carcass. Encourages muscle growth.

Accuracy

A measure of the accuracy of the index. The higher the number the better.

Index values

The sum of the sub-index values and potential profit per lamb born.

Ranking

Where the animal ranks in the population.
